Product Description: The Leading Edge Rebel™ self-retracting lifeline (SRL) line is a fall protection system allowing users to tie-off at foot level. It has been edge tested to VG11 RfU 060 to provide protection over an edge (Type A). It has a heavy-duty thermoplastic housing and is designed featuring a stackable design, and an impact indicator to provide verification of whether the equipment has been involved in a fall. The lifeline will extend as the user moves away, and retract automatically, enabling the user to move about within a recommended working area at normal speeds. In the event of a fall occurring, a speed sensing brake system activates, stopping the fall and reducing the forces imposed on the user to safe levels.
